- TALLY
Cybernet, Cochin

PROJECTS

VerDIS

Domain : Windows Application

Front End : **VB 6.0** | Backend: **Vista DB 2.1,**

Aksam 6.0

- Offers a straightforward and user-friendly environment for quick retrieval of legal cases published by Kerala Law Times since 1949.
- Various search options have been provided to users, encompassing searches by judges, advocates, acts, sections, citations, and word searches.
- A robust security measure has been implemented to prohibit the installation and operation of software across various systems.

AWARDS & CERTIFICATIONS

- Rajyapuraskar award for Bharat Scouts and Guides (1997)
- Rashtrapathi award for Bharat Scouts and Guides (1998)

PROFILE

Passionate Software Development Expert

With 3 years of prior experience in coding, testing, and project management, I am a dedicated software development expert with a proven track record of delivering high-performance applications. Despite a long career gap, my passion for technology and continuous learning have kept me sharp and ready to tackle new challenges. Eager to apply my expertise and drive to make a significant impact.

WORK EXPERIENCE

KLT Infotech 02/2007 - 09/2008

SOFTWARE PROGRAMMER

- Developed and maintained software applications according to client specifications and organizational standards.
- Conducted thorough testing and debugging to ensure software functionality and stability.
- Participated in code reviews to maintain code quality and enhance team knowledge.
- Demonstrated strong problem solving in resolving critical issues.

Unique soft 01/2005 - 01/2007

SOFTWARE PROGRAMMER

- Demonstrated strong problem solving in resolving critical issues.
- Detected and tracked software defects and inconsistencies in the program.
- Learned multiple coding languages and development frameworks to serve needs of changing development program.

MINI PROJECTS

E-Commerce

Domain : Web Application

Front End: **ASP.NET** | Backend: **SQL Server**

The system has two modules: admin and user. Admins manage product and category details, while users view products, add items to their cart, and generate bills based on the total price.

Job Portal

Domain : Web Application

Front End: **ASP.NET MVC** | Backend: **SQL Server**

The system has two modules: company and user. Companies can add job listings and details, while users can view or search for jobs by skill, experience, or location, and apply by uploading their CV. Companies receive notifications when applications are submitted.

Gas Booking

Domain : Web Application

Front End: **ASP.NET CORE MVC** | Backend: **SQL Server**

The system has three modules: admin, staff, and customer. Customers log in to book cylinders online, staff accept the consumer number from customers to book cylinders, view booking details, and deliver cylinders. Admins manage staff, edit cylinder details, and search for customers by booking mode, booking status or time period.
